PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Front-End Developer and UI/UX Designer with a strong technical foundation in building responsive, modern, and user-centric web applications. Proven ability to translate complex design wireframes into clean, semantic, and functional code. Skilled in modern JavaScript frameworks and serverless backend solutions, eager to contribute technical skills and a passion for problem-solving to a dynamic development team.

CORE COMPETENCIES

Front-End Frameworks:	React, Next.js (App Router / Pages Router)
Web Technologies:	HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, Semantics & Web Standards
Backend & Cloud:	Firebase (Authentication, Firestore), Supabase (PostgreSQL, Realtime database)
UI/UX & Prototyping:	Figma, Wireframing, User Interface Design, Visual Hierarchy, Design-to-Code Translation
Tools & Workflow:	Git, GitHub (Version Control), Cross-Browser Compatibility, Debugging, DevTools
Soft Skills:	Agile collaboration, strong attention to detail, rapid adaptability, effective communication

EDUCATION & CERTIFICATIONS

NOCTI Certification in Web Development

Expected Completion: December 2026

Design and Technology Institute — Accra, Ghana

- Core focus on advanced web layout design, structured industry-standard coding practices, and UI/UX implementation frameworks.
- Acquired robust practical competencies in software system integrations, technical problem isolation, and layout optimizations.

KEY TECHNICAL PROJECTS

Full-Stack & Dynamic Web Applications

- Developed and deployed dynamic applications leveraging **React** and **Next.js** to deliver fast, SEO-optimized, and highly user-centric front-end experiences.
- Integrated production-ready serverless architecture using **Firebase** and **Supabase** to orchestrate user authentication flows, real-time secure database synchronization, and structured cloud asset management.

Responsive Web Application Portfolios

- Designed and engineered multiple fluid, fully responsive layouts from scratch using clean HTML5, CSS3, and JavaScript, validating cross-device navigation symmetry across mobile, tablet, and desktop views.
- Built strict semantic structures to improve global accessibility standard compliance and technical search engine optimization (SEO) baselines.

UI/UX Design-to-Code Frameworks

- Created high-fidelity, interactive layout mockups and wireframes within Figma, systematically mapping out user personas, precise color palettes, and balanced typography scales.
- Successfully translated sophisticated Figma mockups into pixel-perfect, highly maintainable, and decoupled front-end production code codebases.

PROFESSIONAL EXPERIENCE & HIGHLIGHTS

Technical Trainee / Web Developer

Ongoing

Design and Technology Institute

- Engaged in rigorous hands-on technical environments focused on version control management, code quality iterations, and strict sprint deadlines.
- Collaborated in agile team settings to resolve complex software debugging conflicts, continuously monitoring and optimizing asset performance metrics.
